

Assignment: User Management Dashboard (Jiva Health)

Overview

You are required to build a User Management Dashboard for a digital health platform called Jiva Health, based on the provided UI mockups. The dashboard will allow admin users to view, manage, and track users, their family members, orders, payments, and profile details.

The assignment must be completed within **3 working days** and submitted as a working web application (frontend + optional backend). Use your judgment to fill in any missing details, but stay true to the designs.

Provided UI References (5 screens)

- User Management (List View) – table showing users with filters, status, and action buttons.
- User Detail Page – user profile info, metrics (orders, appointments, family members, spent), personal info, addresses, upgrade/active buttons.
- Order History + Payment History – list of orders with item details, dates, amounts, and status.
- Order Detail Page – expanded view of an order (medicine name, quantity, price, delivery status).
- Family Member Management – view/add/edit family members linked to a user.

Functional Requirements

1. User List Page

- View all registered users
Show summary cards: Total Users, Prime Users, Non-Prime Users, Total Family Members.
- Display all users with columns: Name, Role (Patient/Nurse), Status (Active/Inactive), Joined date, Last active, Appointments count, Actions (View, Edit).
- Search by name, email, or phone.
- Filter by status (All / Active / Inactive).
- Buttons: Add User, Upgrade to Prime.

2. User Detail Page

- Display avatar, name, status badge, role, and user ID.

- Metrics: Total Orders, Total Booking & Appointment, Total Family Members, Total Spent (₹).
- Buttons: Upgrade to Prime, Active (toggle status).
- Personal Information: Email, phone, DOB, gender, blood group (editable).
- Addresses: show the default address with type (Home/Work), and allow adding/editing.
- Tabs or sections for:
 - Order History (list of orders with date, item, amount, status)
 - Payment History (transaction id, date, amount, method)
 - Family Members (list of members: name, relation, contact, DOB, actions)

3. Order & Payment History

- Order History table: Order ID, Date, Items (e.g., Paracetamol 500mg - 30 tablets), Total Amount, Status (Delivered, Pending, Cancelled).
- Payment History table: Payment ID, Date, Amount, Method (Card/UPI/Cash), Status.
- Click on an order to view the Order Detail Page with a full breakdown (shipping address, payment info, itemised list).

4. Family Member Management

- From the user details page, manage family members: add new member (name, relationship, DOB, phone), edit, delete.
- Show total family member count updates dynamically.

Technical Requirements

Frontend:

- React.js / Next.js
- TypeScript preferred
- Responsive Design
- State Management (Redux Toolkit, Zustand, Context API, etc.)
- Clean Component Architecture

Submission Deadline

- Complete and submit the assignment within **3 working days** from the date of receiving this assignment.
- After the deadline, a **Google Form link** will be shared for submission.
- All candidates must submit their **Git Repository Link** through the provided Google Form only.
- Ensure that the repository is accessible and contains all necessary source code, setup instructions, and documentation.

- Submissions through email, WhatsApp, or any other medium will not be considered unless specifically requested.

Good Luck!
